EDUCATION

Bharati Vidyapeeth College of Engineering

Bachelor of Technology in Computer Engineering

Pune, Maharashtra

2023 – Present

- **CGPA: 8.50+/10**
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

PROJECTS

ORDO – Hyperlocal Logistics Platform (Ongoing) | *React Native, Node.js, Express.js, MySQL*

- Developing a hyperlocal logistics platform connecting customers, retailers, and delivery partners through a unified order management system.
- Designing RESTful APIs for authentication, order lifecycle, inventory management, and delivery workflows.
- Implementing JWT-based authentication and role-based access control for customers, retailers, delivery executives, and administrators.
- Designing a normalized MySQL database schema for users, stores, products, orders, deliveries, and payments.
- Building reusable cross-platform mobile interfaces using React Native following modular architecture and responsive design principles.
- **Future Roadmap:** AI-assisted demand forecasting, delivery route optimization, and intelligent inventory recommendations.

AutoSense – AI-Ready Vehicle Marketplace (Ongoing) | *React.js, Node.js, Express.js, MySQL*

- Developing a full-stack marketplace for buying and selling pre-owned vehicles with secure authentication and role-based access.
- Building RESTful APIs for vehicle listings, image uploads, wishlist management, advanced search, filtering, and user operations.
- Designing responsive dashboards for buyers, sellers, and administrators with complete CRUD functionality.
- Designing an optimized MySQL database schema for users, vehicles, transactions, favourites, and search history.
- Implementing scalable backend architecture following modular service-based design principles.
- **Future Roadmap:** AI-powered vehicle price estimation, fraud detection, personalized recommendations, and best-value purchase insights using market trends and vehicle history.

DocFlow – Intelligent Document Management System | *React.js, Node.js, Express.js, MySQL*

- Developed a secure document management platform for uploading, organizing, and managing business documents.
- Implemented JWT-based authentication and role-based access control to securely manage user permissions and document access.
- Designed RESTful APIs for document upload, categorization, search, download, and document lifecycle management.
- Designed a normalized MySQL database schema for users, folders, documents, metadata, and activity logs.
- Built responsive dashboards with advanced search, filtering, document version tracking, and complete CRUD functionality.
- **Future Roadmap:** Integrate AI-powered document summarization, semantic search, metadata extraction, and intelligent document classification using LLM APIs.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Technologies: React.js, React Native, Node.js, Express.js, MySQL

Core CS: DSA, OOP, DBMS, OS, CN

Tools: Git, GitHub, Postman, Linux

ACHIEVEMENTS

- CGPA: **8.50+/10** in Computer Engineering.
- Built multiple backend-focused full-stack applications.
